

ROBATECH SAYS THANK YOU

Robatech looks back on eleven eventful days at drupa 2024 in Düsseldorf. The Swiss manufacturer of adhesive application systems would like to thank visitors for the great interest and lively exchange at its booth. With its innovative folding and gluing solutions, Robatech is successfully jumping on the bandwagon of trends such as e-commerce and paperization.

The atmosphere at the Robatech booth was lively and the reception was friendly. People were talking enthusiastically about trends and products or folding their own souvenir boxes. These were creased by the liquid creaser PerfectFold, which was at the center of interest, with the creaser liquid SpeedUp, so that the effect could be experienced directly. Many took the opportunity to marvel at the result of the perfectly folded corrugated boxes. True to Robatech's trade fair motto "Fold it. Glue it. Love it."

In addition to the **new PerfectFold**, which makes folding corrugated board easier and more efficient thanks to the application of the SpeedUp creaser liquid, Robatech also presented other attractive products. The Vivo 18 coating head, for example, ensures **convenience in e-commerce**. At speeds of up to 250 m/min, it applies the PSA hot melt adhesive so evenly and precisely that tear strips and silicone release liners can be glued quickly and cost-effectively in-line to shipping packaging. The Presto cold glue coating head meets the demand for sustainable packaging – i.e. **paper instead of plastic**. Cold glue is an adhesive that penetrates paper and is also heat-resistant. The excellent application quality of the Presto electric coating head is ideal for gluing paper carrier bags or paper drinking straws.

This and much more was presented by the motivated Robatech employees in green shoes matching the brand – a splash of color and a real eye-catcher.

Trade fair review: All information about the exhibited products as well as impressions of the trade fair booth in the form of vlogs and pictures can be found at:
