## ROBATECH AT CCE:
## FOLD IT. GLUE IT. LOVE IT.

*At CCE in Munich from March 11 to March 13, 2025, Robatech will be presenting PerfectFold, a system that makes folding corrugated cardboard boxes more efficient and precise. Other highlights include adhesive application heads for silicone release liners and tear strips in the e-commerce sector and a coating head for gluing paper carrier bags with cold glue.*

The **PerfectFold liquid creaser**, that visitors can experience live at CCE, is as brilliant as it is simple. The system applies a creaser liquid to the fold lines of a corrugated board so that the blanks can be folded precisely and with little effort. Cracking of the cardboard, irregular gaps and fishtailing are now history. Corrugated cartons creased with PerfectFold provide exact internal dimensions so that inserts can be fitted into folding cartons without any problems. Robatech uses the proven Sempre 30 application heads to apply the liquid. The SpeedUp creaser liquid, which leaves no marks on the corrugated cardboard, was specially developed for PerfectFold.

The other attractions at the Robatech booth are the two electrical application heads Vivo 18 and Presto. The space-saving **Vivo 18 hot melt coating head** is characterized by its even, precise adhesive application, which can be used to flexibly apply silicone release liners or tear strips to e-commerce shipping packaging. The **Presto cold glue coating head** stands for a high-quality coating application with a precise start and exact tear-off. Ideal for applications such as neatly gluing window envelopes or paper carrier bags.

## ROBATECH

Robatech optimizes the industrial hot melt and cold glue application with sustainable and innovative adhesive application systems. Since 1975, Robatech has been developing and producing high-quality control systems, application heads, melters, and dosing systems that make gluing processes more environmentally friendly, safe, and straightforward. The Robatech Group, headquartered in Muri/AG, Switzerland, is represented in more than 80 countries. More than 670 employees worldwide provide personal and fast customer support in a wide range of industries.
