

LOCAL GLUING HEROES AT PACK EXPO IN ATLANTA

From March 10-12, 2025, the locally headquartered Robatech USA is exhibiting for the first time at PACK EXPO Southeast in Atlanta. The self-proclaimed Gluing Heroes offer innovative solutions for applying adhesive as well as for folding corrugated cardboard boxes.

New and exciting: Visitors can experience the PerfectFold liquid creaser live at PACK EXPO Southeast. The system is as brilliant as it is simple. A proven application head applies a special creaser liquid to the fold lines of corrugated cartons so that the blanks can be folded precisely and with little effort. Cracking of the cardboard, irregular gaps and fishtailing will be history – corrugated cartons creased with PerfectFold provide exact internal dimensions so that inserts can be fitted into folding cartons without any problems.

Proven solutions: First and foremost, application systems for various requirements will be on display: The well-known Vision melter for high-precision gluing, and the updated Volta jetting head that makes stitching very easy and profitable are only two examples. In addition, Robatech will also be exhibiting their 360° Gluing solution with a cobot from Kuka.

Robatech at PACK EXPO Southeast in Atlanta | March 10-12, 2025 | booth 2411
